***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on October 14, 2009 has been entered.

**Detailed Action**

This office action is a response to applicant's information disclosure statements submitted October 14, 2009, November 3, 2009, November 6, 2009, November 12, 2009, and November 18, 2009. This application is a national stage application of PCT/US04/23099, filed July 16, 2004, which is a continuation in part of US application 10/621027, now US patent 7507724, filed July 16, 2003, which is a continuation in part of PCT/US02/01276, filed January 15, 2002, which claims benefit of provisional application 60/261911, filed January 16, 2001.

Claims 14-17, 19-25, and 27-29 are pending in this application.

Claims 14-17, 19-25, and 27-29 as amended are examined on the merits herein.

**Priority**

Currently, the application claims priority to US application 10/621027, PCT international applications PCT/US04/23099 and PCT/US02/01276, and provisional application 60/261911. However, the applications PCT/US02/01276, 10/621027, and 60/261911 fail to provide written description under 35 USC 112, first paragraph for instant claims 14-17, 19-25, and 27-29 because the applications do not disclose beta-glucans having side chains of two or more saccharides linked by a (1,3) linkage. Rather, these parent applications disclose barley glucans having a straight chain containing a mixture of (1,3) and (1,4) linkages, as well as fungal glucans of indeterminate composition. Therefore the effective filing date of claims 14-17, 19-25, and 27-29, all of the currently pending claims, is seen to be the filing date of PCT/US04/23099, filed July 16, 2004.

### **Reasons for Allowance**

Applicant's information disclosure statements submitted October 14, 2009, November 3, 2009, November 6, 2009, November 12, 2009, and November 18, 2009 have been fully considered and not found to be the basis for any new grounds of rejection against the claims as previously allowed in the office action of September 24, 2009. For example, the document WO00/152381 (Reference included with PTO-892) cited in the European office action included with PTO-1449 discloses combinations of antibodies and beta glucans but does not utilize beta (1-3) glucans having beta (1-3) side chains of two or more subunits linked by beta (1-6) linkages as required by the instant claims. Also, although the reference discloses the possibility of using solubilized

beta glucans it suggests that solubilization be carried out by chemically modifying the beta glucans, for example by carboxymethylation, which would place them outside the scope of beta glucans in the instant claims. Similarly, the beta glucans recited in the US pre-grant publication 2005/0208079 (cited in PTO-892) discussed in the Australian office action cited in the PTO-1449 submitted November 6, 2009, or the US patent 4833131 (cited in PTO-892) discussed in the European office action submitted November 3, 2009, do not have the specific branching recited in the instant claims. On the other hand the references WO2006/007372 (included with PTO-1449), EP0759089 (included with PTO-1449) and US6069216 (cited in PTO-892) disclose beta glucans having the claimed structure but do not disclose combining them with antibodies. One of ordinary skill in the art would not have considered these beta glucans as necessarily having the desired antibody-enhancing effects that would be required to substitute them successfully into the disclosed inventions previously mentioned in US2005/0208079 or US4833131, for example. Furthermore, the US patent 7507725 (cited in PTO-892), although it discloses the claimed invention, has the same inventive entity as the instant application and therefore is not eligible as prior art under 35 USC 102(a) or 102(e), and was not published more than one year before the effective filing date of the instant claims as required by 35 USC 102(b). Therefore no new grounds of rejection are introduced against the instant claims.

Thus the claims are seen to be allowable for the same reasons recited in the notice of allowance submitted September 24, 2009 and hereinabove.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled, "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric S. Olson whose telephone number is 571-272-9051. The examiner can normally be reached on Monday-Friday, 8:30-5:00.
